LEADER RUN

## EVOT

The EVOT professional treadmill is the result of a carefully studied design, tested by professional athletes. In the centre of its handlebars there is a keypad that allows us to choose between the different personalised training programmes, a cool down mode to finish your training sessions correctly and to regulate the intensity of the fan to make your sports practice more comfortable.

In addition, its large running surface and its 12-point PULFLEX™ cushioning system, medically recommended to prevent ankle, knee and lower back injuries, allow users to run at speeds of up to 20km/h in a comfortable and pleasant way, making your workout an impact-free session.

**DIMENSIONS**

208 x 88 x 156 cm

**MAXIMUM USER WEIGHT**

200 kg

**TRANSPORT WHEELS**

Yes, the product is fitted with wheels for easy transport.

**EMERGENCY BRAKE**

Yes, by means of a large red button on the central panel and a safety cord, which can be attached to clothing.

**TRANSMISSION**

POLY-V® belt drive system and Kevlar cords for a fluid and smooth ride.

**SPEED**

1-20 km/h

**MOTOR**

Professional AC motor, with 10hp power.

**CUSHIONING**

Professional 12-point PULFLEX™ shock absorption system (medically recommended to prevent ankle, knee and lower back injuries).

**CONSOLE FUNCTIONS**

Time Elapsed, Date, Volume, Fan, Time, Distance, Calories, Speed, Incline, Heart Rate, Start / Stop.

**EXERCISE MODES**

Mountain, X-Country, Fat Burn, Cardio, Strength, Intervals, Manual, Time, Distance, Calories, Heart Rate.

**DESIGN PROCESS**

Biomechanics and ergonomics study under the supervision of professional and athlete partners. After a long period of design; from sketching, engineering research, prototype production, testing by professional athletes, our products are launched on the market.
