NEX-E80T

A woman with blonde hair in a ponytail is running on a treadmill. The scene is dimly lit with a strong red/orange glow. The text 'RUN THE FUTURE FEEL THE CONNECTION' is overlaid in white, with 'FUTURE' and 'CONNECTION' highlighted by red rounded rectangular borders.

NEW GENERATION OF TECHNOLOGY

CardiOS is the new interface developed for the consoles of the Professional Cardio range. Its purpose is to modernize and optimize the technological ecosystem of our machines, offering a proprietary, robust environment aligned with international standards, prepared to support the next generation of services and functionalities.

Effort, research, and innovation have allowed us to identify opportunities for improvement and new capabilities that will increase reliability, simplify technical management, and enrich the experience for both sports centers and users.

With CardiOS, regain control over the system, gain technological independence, and take a generational leap, consolidating the brand as a benchmark in professional fitness innovation.

Fitness Machine Service

The FTMS (Fitness Machine Service) protocol is a Bluetooth communication standard for fitness equipment that allows interaction between devices—such as rollers, bikes, and treadmills—and mobile applications. It facilitates the integration of equipment from different brands, making training more interactive and controlled by apps like Zwift or Kinomap.

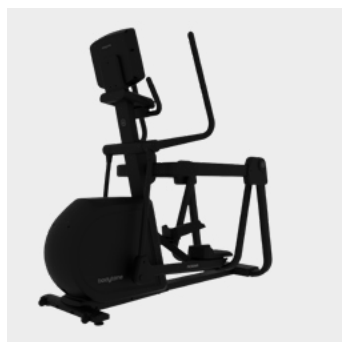

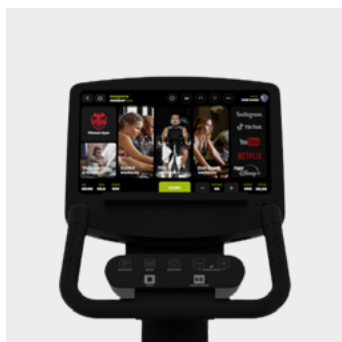

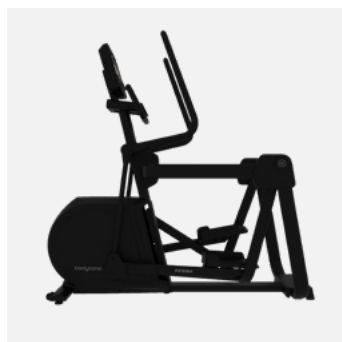

NFC – User Authentication

NFC (Near Field Communication) wireless technology for a simple login: bring an NFC-enabled smartphone close so the MyBodytone app connects automatically to the console.

Service Mode

Professional LED consoles integrate a hidden service mode, accessible only to authorized technicians. This mode allows for diagnostics, calibrations, and preventive maintenance, ensuring precise system control and the operational reliability of the cardio equipment.

NEX-E80T

Elliptical

The NEX-E80 is the premium elliptical trainer in the NEXION line, equipped with a display. Its compact design and essential connectivity make it an efficient and accessible solution, without compromising a smooth and comfortable training experience. It stands out for balancing performance, aesthetics, and functionality, with the reliability and design that define Bodytone.

TOUCH SCREEN

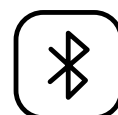

CONNECTIVITY AND FUNCTIONS

- Operating system: CardiOS, Google certified
- Screen / Video resolution: 15.6" / 1080p Full HD
- Metric System / Imperial System
- Bluetooth Audio, Bluetooth Heart Rate Monitors, FTMS (Bluetooth SIG)
- Remote updates via internet
- Multi-method login (NFC, QR code, user/pass)
- Self-diagnosis
- Total distance counter
- Maintenance notice (distance): 9,999 Kms
- Compatible with BT Manager control panel
- Compatible fitness apps: MyBodytone, FitShow, Fulgaz, Kinomap, MyWhoosh, Onelap, Volava, Wahoo, Zwift

TRAINING PROGRAMS

- Quick Start mode and free training
- Six guided training programs: Hill, X-Country, Fat Burn, Cardio, Strength, and Intervals
- Three user training modes: User 1, User 2, and User 3
- Goal-based training modes: time, distance, calories, and heart rate
